History AutoCAD LT was a simplified version of AutoCAD, made by the same developers, but without the ability to run AutoCAD plug-ins. As AutoCAD users desired additional functionality, AutoCAD LT was later replaced by AutoCAD LT with Visual LISP (VistaLISP) functionality. This addition removed the need for the user to install the AutoCAD plug-ins into the system, making AutoCAD LT a true "Plug-In Enabled" application. AutoCAD LT 2D Interface, was the name of the application when the 2D Interface was still available for Mac OS X and Windows. In AutoCAD LT 3D Interface. was replaced by AutoCAD 3D LT. AutoCAD LT products were often installed on Windows NT servers.
