Q: How to stop a long running script or proc in plink I need to execute a script (or via plink) that take a while to complete. When the process is complete I need to be able to send an exit command so I don't have to wait on it. Any ideas as to how I can do this? A: If you want to use screen or tmux, press: C-a : Then press [Enter] to get into the new screen. There, press: H : to enter a "help" mode. It should give you all the commands, including how to exit a screen. If you don't want to use screen, you might consider using a function key at the beginning. In plink: > function Then: H : to enter help. A: Use ctrl-a to enter the "partial" screen, and then either press ctrl-c to exit, or add a command to perform whatever you want once it's done. The latter is often the best approach. Q: Passing array of objects from one view to other using post in android i want to send a array of objects from one view to another. I want to push the results of each object (using "a" key) to array and then want to get it in another view. below is my code: Intent i = new Intent(getApplicationContext(), MyActivity.class); Bundle bundle = new Bundle(); 6a5afdab4c

Solve crossword puzzles with XWordGiver! Build and share your own custom crosswords! Build new crosswords on the go with less than a minute! Create thousands of unique crosswords at any time! Create high quality word games out of free word lists! Save files and play your crosswords offline! Create and edit crossword files using any language! The easiest way to create crossword puzzles at the click of a button! Hints: Solving crossword puzzles is a very popular hobby and if you are truly passionate about this activity, you can go one step further and experiment with creating your own puzzles, using specialized apps like XWordGiver. User-friendly GUI The main window of the utility is neatly organized and looks quite polished, so you can focus on your puzzles rather than waste time trying to locate features or buttons. Additionally, buttons come with brief explanations whenever you hover the mouse cursor over them. When you want to generate a new crossword, you need to specify its size, i.e. the number of cells and rows that should be included. You also get the possibility to explore the list of block patterns and choose the one that matches your idea. However, you need to keep in mind that if you are interested in a large puzzle, it might take some time until it is generated, so patience is of the essence. Supports several input methods Depending on your preferences, you can select one of the several input types provided by XWordGiver: Kana, Alphabet, Kanji, Cyrillic or Digit. You can switch between horizontal and vertical input, while also specifying the dictionary that you need. Crosswords can be saved as images Once you are fully satisfied with the way your crossword looks like, you can either print it or you can export it to an image file that can be shared with other puzzle enthusiasts. Not only can you save it as BMP or EMF, but you can choose if you want to export the empty crossword or the one with the solution. XWordGiver Description: Solve crossword puzzles with XWordGiver! Build and share your own custom crosswords! Build new crosswords on the go with less than a minute! Create thousands of unique crosswords at any time! What's New - Fixed: [Play Store] Crossword puzzle generator added to the main menu - Fixed: [App Store] Crossword puzzle generator added to the main menu [Hospital-based observational studies in gastroenterology]. Many gastroenterologists prefer to work in and have access to a tertiary centre, as they gain exposure to challenging cases, have better instruments at their disposal and benefit from more consultant time. Hence, we assessed if this also has an effect on research. We analysed articles published by gastroenterologists in the Netherlands in all Dutch journals participating in the EASE-disease classification of the European Society of Gastrointestinal Endoscopy (ESGE), and were compared with articles published in gastrointestinal endoscopy journals by physicians in other disciplines. The annual and absolute number of publications, average citations per publication (ACPP), the percentage of publications (PP) and the mean impact factor (IF) of the journals were also compared. The relative ACPP of gastroenterologist-authored research was 1.35, i.e. in all gastroenterology journals they published articles with a mean ACPP of 1.35 times higher than non-gastroenterologist-authored articles. Gastroenterologist-authored articles appeared in 15% of the Dutch journals compared to 2.8% in the other disciplines. The mean IF of gastroenterologist-authored publications was 3.21 compared to 2.05 of non-gastroenterologist-authored ones.
