A difficult to exploit vulnerability allows an unauthenticated attacker with access to the network over multiple protocols to compromise Java SE. Successful attacks of this ... November 29, 2005 Antivirus vendor Symantec has announced the discovery of the "Netwise" vulnerability, which allows an unauthenticated attacker with access to a network over multiple protocols to compromise Java SE. Successful attacks on this vulnerability can lead to security degradation and failure of Java SE protections, including compromised data integrity in code, sensitive information interception, denial of service, etc.
